

ABSTRACT OF THE DISCLOSURE

2 A data presentation system and method for selecting, processing, and displaying
3 survey information for evaluative purposes, which includes a storage device, a display
4 device, a server, and a network connecting the server to the display device. The server
5 is programmed to maintain in the storage device a database with data information from
6 a data collection, perform calculations on the data information from the data collection,
7 and produce on the display device graphical data displays indicating measurement results
8 based on selected population characteristics.
